Law- and Technology-Related Engagement

2025	AI Bill Extraction and Highlighting System
-------------	---

- Developed an AI-powered document analysis system for extracting structured information from diverse PDF billing documents.
- Designed the system to identify key fields, including charge items, amounts, dates, addresses, and organisation names, and to highlight relevant content directly within source documents.
- This project reflects practical engagement with AI-assisted information extraction, document intelligence, and workflow enhancement in text- and record-intensive contexts.

- **Project:** Bill Extraction Demo

Legal Advisor

2025

UNSW Trustworthy Project, Australia

- Contributed legal perspective to a project concerned with trustworthy technology and interdisciplinary collaboration.
- Supported consideration of legal and ethical issues arising in technology-related research and development contexts.

Education-Related Engagement

AI-Assisted Bilingual Reading Tool for Chinese Learners

2025

- Developed an AI-enabled educational web application exploring the use of generative AI in bilingual language learning.
- Designed mixed-language reading materials that combine English passages with selectively embedded Chinese words and expressions to support vocabulary development and character recognition among beginner learners.
- The project reflects an interest in AI-assisted education, language learning, and the development of accessible tools that support gradual progression toward independent comprehension.
- **Project:** AI Bilingual Reading Tool

Invited Speaker

Dec 2023

New Era Family Education and Child Development Forum, Tangshan, China

- Invited by experts to participate in the forum as a speaker.
- Delivered a presentation titled *Exploring Family Education in the New Era* alongside other invited experts, contributing to discussion on contemporary family education and child development.
